Open to Students

~Entering Grades 4-7 for 2022-2023 School Year~

## **Tuesday: July 12 ~ Maker Day ~**

Come spend the day exploring the joys of STEM through making! This session will be focused on creating games, activities and projects through design, development and construction. Participants will use STEM tools like programmable computers and electronic compounds along with recycled and craft materials to make their designs come to life. Come and join us for this fabulous day of making!

## **Wednesday: July 13 ~ Game Design Day ~**

Games are everywhere now whether on a physical board or online with friends we are always engaged. This session is built around understanding and developing game design. Participants will engage in developing games through coding, programmable electronics and crafting physical games through construction.
